Date	19 october 2022
Team ID	PNT2022TMID32673
Project Name	Fertilizers Recommendation System For Disease Prediction
Maximum Marks	4 Marks

Solution Architecture:

It find the disease attacked in the crop and recommend the exact solution to the problem and the image of the diseased plants are obtained and compared with the observed data set of the diseased plant . it goals are

- Predict the disease and give solution
- To Make benefit to the farmers
- To make agri profitable

Process:

1. Image acquisition
2. Image processing
3. Disease prediction
4. Fertilizer recommendation

Example - Solution Architecture Diagram:
